Dear Healthcare Partner,

This is the first issue of our provider directory with our new name: **Baptist Medical Network**. This past March we rebranded our organization to more clearly show our alignment with the six hospitals of Baptist Health System: Baptist Medical Center, North Central Baptist Hospital, Northeast Baptist Hospital, St. Luke's Baptist Hospital, Mission Trail Baptist Hospital, and, in New Braunfels, Resolute Hospital.

Our new name marks a milestone since our organization's founding in 2007. Starting with a few practices, Baptist Medical Network is now one of South Texas' largest healthcare provider organizations. It employs more than 220 physicians, physician assistants, and nurse practitioners. A nearly equal number of medical support employees and close to 600 operational experts round out the shared initiative of supporting the clinicians in doing what they do best: providing quality patient health care.

This directory presents our more than 75 primary care providers working through 28 clinics conveniently located throughout the 17 communities we serve. On pages 6 and 7 is listing of these clinics aligned with a map.

We hope this directory facilitates your awareness of our providers and your consideration of working with them in the care of your patients. We are committed to continually refining our network of providers and reaching out to other medical professionals in the spirit of connection and collaboration. Our goal is to be a critical part of a larger network of quality healthcare available to patients of all ages, genders, ethnicities, and walks of life.

Best regards,

Steve Lara

PRIMARY CARE

From simple checkups to managing chronic conditions, Baptist Medical Network of skilled primary care physicians, physician assistants and nurse practitioners prioritize the delivery of proactive, personalized and passionate care for people of all ages. With dozens of local clinic locations across San Antonio and the surrounding communities, MedFirst Primary Care practices provide adults, teens and children comprehensive care using evidence-based medicine in a supportive environment.
